

## ITSE 2317 – Asg09

For Asg09, complete the following steps:

1. Setup your student website as described in “Website Setup & Assignment Publishing” at the link in the Assignments-J section of Blackboard (Bb).
2. See the page [Java 4330: HTML and CSS Fundamentals](#)
3. Write and publish the code at the following images:
  - a. Image 7. Code – sample-1.html (Name this file index.html). Include a link on the page to jsp\_tags.jsp so that page can be accessed. Add the link to jsp\_tags.jsp to the list of existing links, just after ‘Turtles’.
  - b. Image 8. Code – css-1.css
4. The code output must be exactly like that in Image 9 (with the addition of a link to jsp\_tags.jsp).
  - a. Image 9. Output – sample-1.html
5. See the page [Java 4340: JSP Fundamentals](#)
6. Write and publish the code at the following images:
  - a. Image 2. Code – jsp\_tags.jsp
  - b. Image 4. Code – sample\_included\_file.jsp (w/ errors) (see the page at the link for an explanation of the errors)
7. The code output must be exactly like that in Image 3 (highlights and browser text not required).
  - a. Image 3. Output – jsp\_tags.jsp
8. Publish your assignment per the instructions in “Website Setup & Assignment Publishing” at the link in the Assignments-J section of Bb.
9. In addition to publishing on your student website, compress your NetBeans project folder and upload that .zip file to Bb at the appropriate assignment link before the due date. ONLY .zip. ONLY .zip. ONLY .zip compression format. What format? .zip.

NOTE: index.html is in the “welcome file” list in web.xml and will therefore be returned by the server when the path to the asg09 directory is supplied in the URL address box.
