ITSE 2317 – Asg12

For Asg12, complete the following steps:

1. See the page Java4370: Cookies with JSP
2. Using the code in the images as guides, write and publish code with the following functionality:
    a. index.jsp. This page should allow the user to enter data values for the following 3 cookie names: animal, flower, country.
    b. cookieCreator.jsp. This page should include a file 'cookieCreatorProcessor.jsp'. After the include, output the cookie data using the request.getParameter() function. Include a link on this page to readingCookies.jsp.
    c. cookieCreatorProcessor.jsp. This page should create the 3 cookies using the name::value pairs with expiration times of 2 hours. The cookies should then be added to the response object.
    d. readingCookies.jsp. This page should read the cookies from the request object and output the name::value data. Include a link on this page to sessionCreation.jsp.
3. See the page Java4380: Sessions with JSP
4. Using the code in the images as guides, write and publish code with the following functionality:
    a. sessionCreation.jsp. This page should allow the user to enter data values for the following 2 session keys: artist, color. The page should create 2 session attributes based on the 2 name::value pairs. After creation, the page should use the session.getAttribute method to obtain the values and then output the name::value pairs.
5. Publish your assignment per the instructions in "Website Setup & Assignment Publishing" at the link in the Assignments-J section of Bb.
6. In addition to publishing on your student website, compress your NetBeans project folder and then upload that .zip file to Bb at the appropriate assignment link before the due date. ONLY .zip. ONLY .zip. ONLY .zip compression format. What format? .zip.
